

2500-R4500 520/530/DBC Adapter

old

new

Description

The 2500-R4500 is designed to replace various older style of Texas Instruments Programmable Controllers (520/530/530C/530T) and/or Distributed Base Controllers. The 520/530/DBC units are commonly referred to as "oil pan" or "sump" units due to their boxy shape with ribbed fins.

The 520C/530C/530T programmable controllers (520C-1101/1102, 530C-1102/1104/1108/1112, 530T-1104/1112) attached to the I/O base through the 500-5840 adapter base.

Features

- Connects to existing 500-5864/5828 I/O base (8-slot or 16-slot)
- Use C100 for local-base only, or C200 for local and remote I/O
- Download existing program
- Re-use CTI products when remainder of Series 500 is changed out

Compatibility

- Replaces 500-5840 Adapter Base and 520C / 530C / 530T, or 530-1102/1104, or 500-2103 Distributed Base Controller
- When replacing 500-2103, use 2500-R4500 with 2512 power supply and 2500-RIO-A remote base controller
- Note that open slots in 2500-R4500 cannot be used for I/O
